

Learn CSS with ChatGPT

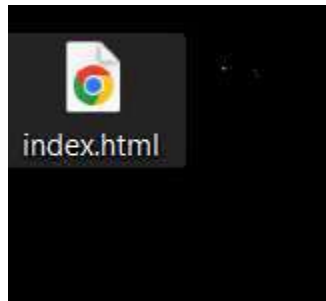

Step 1: Open ChatGPT <https://www.chatgpt.com> and press login button. Select “Continue with Google” and enter your gmail username and password and try to go the below interface. Check Previous Tutorials).

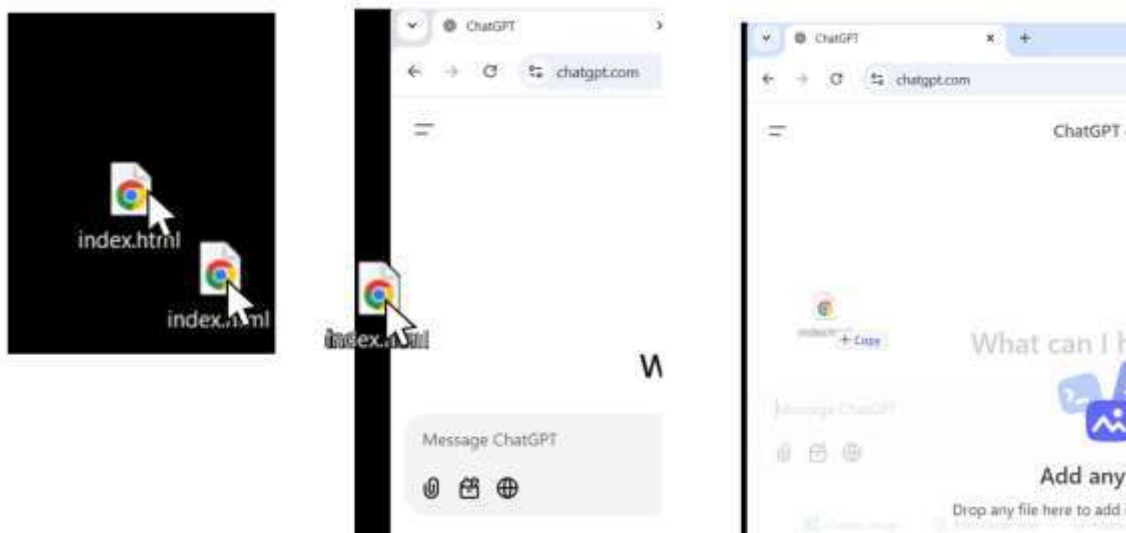

Step 1: Open the previous tutorials index.html page in notepad.

<pre><html> <head> <style> p { color: red; } </style> </head> <body> <p> What Women Want? Isolation and leisure's grace, Absence of warmth can shadow her face. True fidelity, born of respect and insight, Grows from understanding, not external plight. 150 - Book Title - Five Mechanisms @ Amazon. </p> </body> </html></pre>	
---	--

File on the desktop – index.html

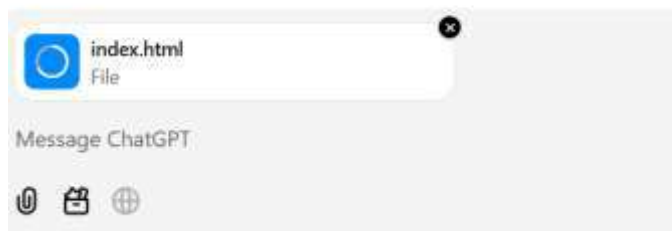

Drag and drop the index.html file into the chatgpt window.

Animation type dragging and dropping the html file into chatGPT.

What can I help with

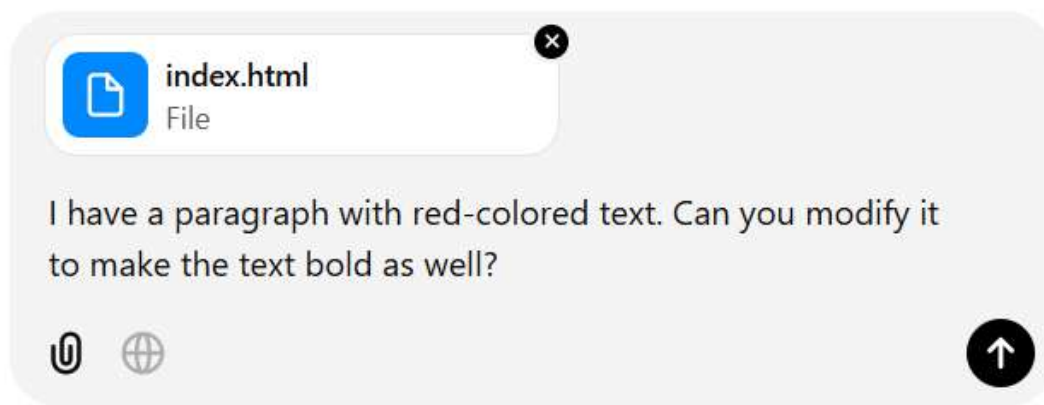

The file will be uploaded into ChatGPT.

Step 2: Once the file is uploaded, type your question or request in the chat. For instance, you can say:

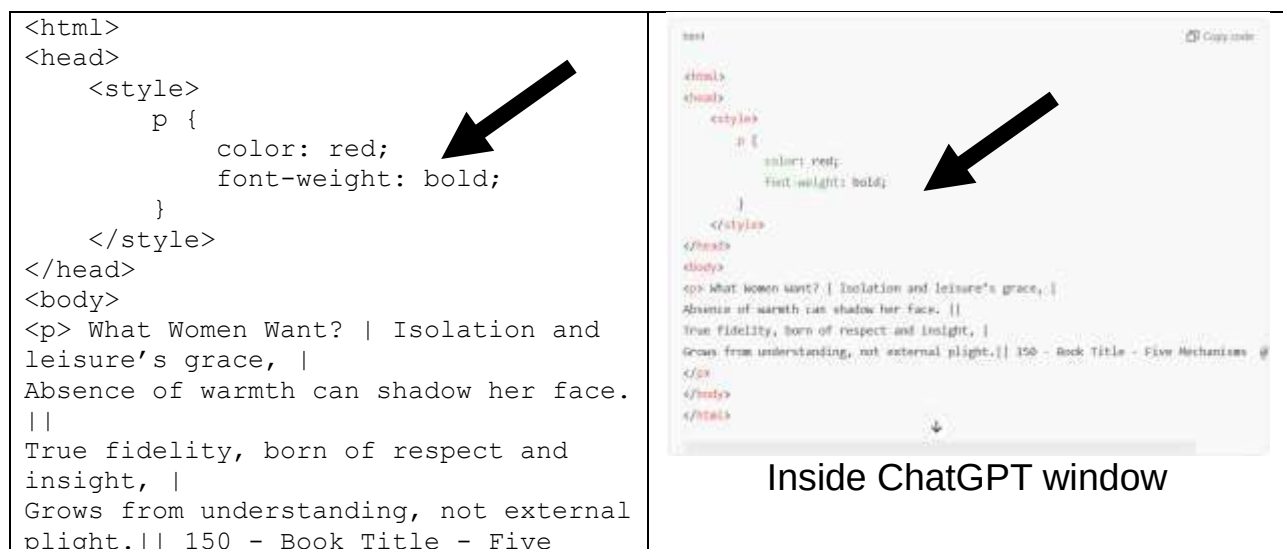

"I have a paragraph with red-colored text. Can you modify it to make the text bold as well?"

What can I help with?

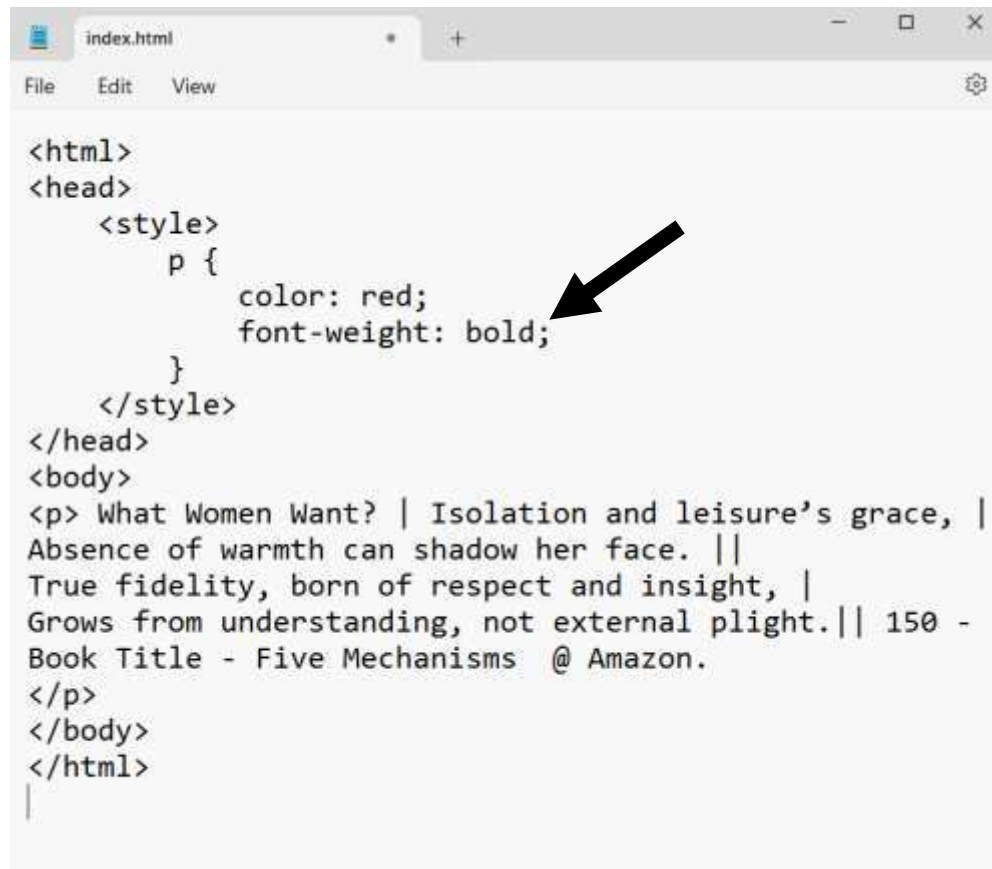

Step 3: See the response from ChatGPT.

ChatGPT will provide a modified version of your code. For example, it might suggest wrapping the paragraph text with a `<b>` tag or using `font-weight: bold;` in the CSS. Here's what the response might look like:

```
Mechanisms @ Amazon.  
</p>  
</body>  
  
</html>
```

Step 4: Copy the modified code provided by ChatGPT and replace your original code with it.

```
<html>  
<head>  
  <style>  
    p {  
      color: red;  
      font-weight: bold;  
    }  
  </style>  
</head>  
<body>  
<p> What Women Want? | Isolation and leisure's grace, |  
Absence of warmth can shadow her face. ||  
True fidelity, born of respect and insight, |  
Grows from understanding, not external plight.|| 150 -  
Book Title - Five Mechanisms @ Amazon.  
</p>  
</body>  
</html>  
|
```

ChatGPT has added css code - font-weight: bold;

Important Points to Note:

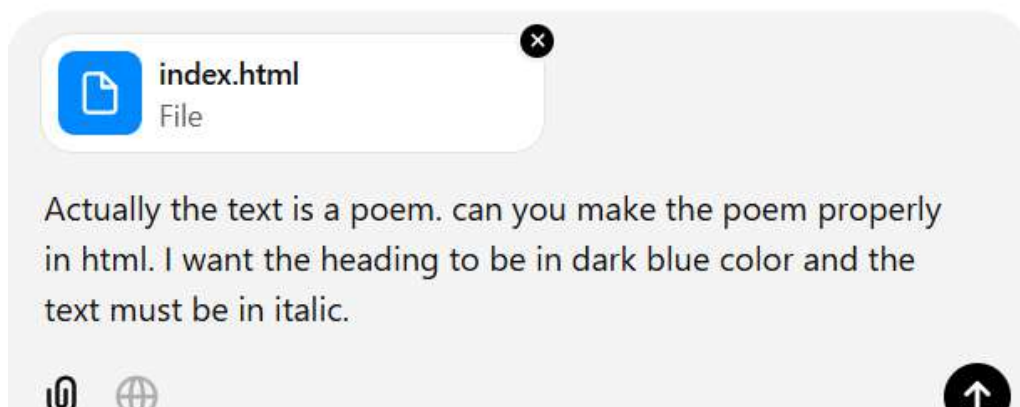

- 1. Drag and Drop the index.html Files into ChatGPT window.**
- 2. Asking ChatGPT to update the code.**

Next tutorial is Learn Javascript Using ChatGPT

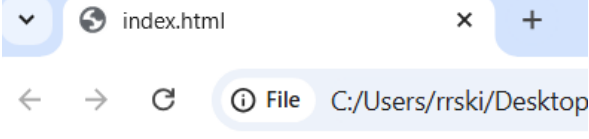

Advanced Tutorials

Drag and drop the updated index.html file. Type the following in the ChatGPT Window.

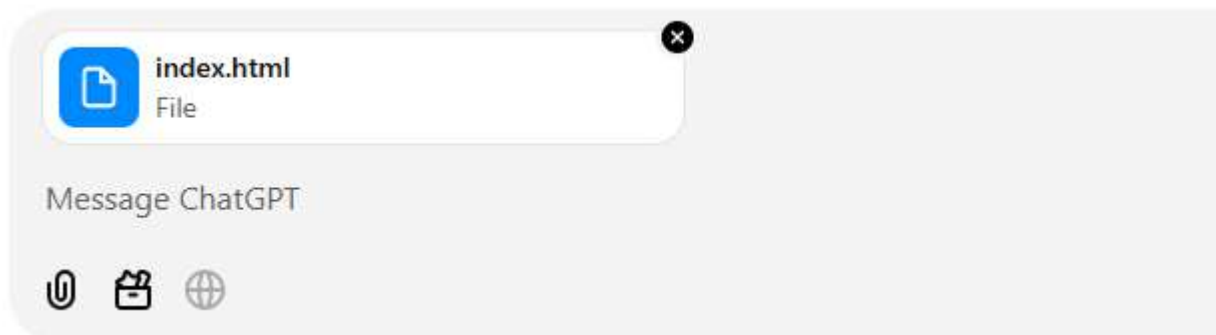

What can I help with?

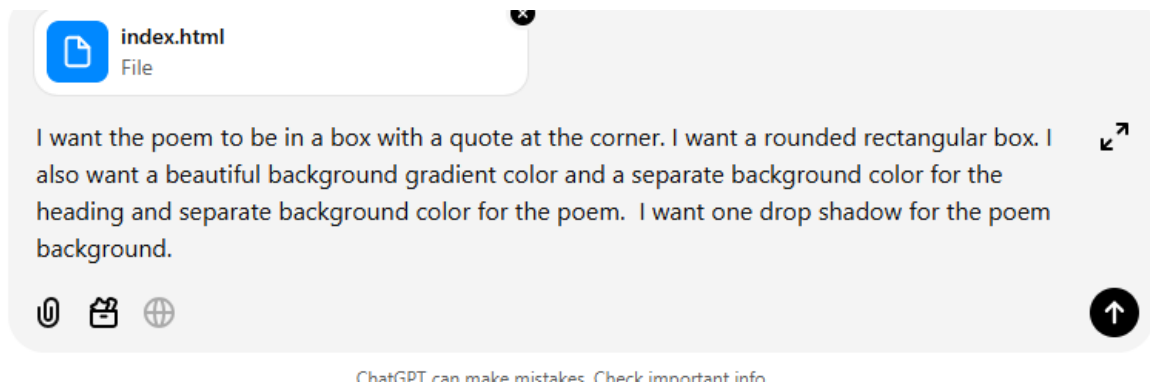

ChatGPT output:

<pre>html <!DOCTYPE html> <html> <head> <style> h1 { color: darkblue; } p { font-style: italic; } </style> </head> <body> <h1>What Women Want?</h1> <p> Isolation and leisure's grace,
 Absence of warmth can shadow her face.
 True fidelity, born of respect and insight,
 Grows from understanding, not external plight. </p> <p>150 - Book Title - Five Mechanisms @ Amazon.</p> </body> </html></pre> 	 The browser window shows the file 'index.html' at the path 'C:/Users/rrski/Desktop'. The rendered page features a heading 'What Women Want?' in dark blue and a poem in italicized text, with line breaks. What Women Want? <i>Isolation and leisure's grace, Absence of warmth can shadow her face. True fidelity, born of respect and insight, Grows from understanding, not external plight.</i> <i>150 - Book Title - Five Mechanisms @ Amazon.</i> ChatGPT has added drakblue color and html code
 and also added heading <h1> etc... ChatGPT has modified CSS and HTML.
---	---

Again – drag and drop the index.html and type the following for updating the poem.

Now type the following in the ChatGPT window.

Advanced CSS styling with ChatGPT. Check the below results carefully.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Styled Poem</title>
  <style>
    /* General Page Background with Gradient */
    body {
      margin: 0;
      padding: 0;
      background: linear-gradient(to bottom right, #e0f7fa, #80deea);
      font-family: Arial, sans-serif;
      display: flex;
      justify-content: center;
      align-items: center;
      height: 100vh;
    }

    /* Poem Container */
    .poem-container {
      background-color: #f5f5f5; /* Light gray for poem */

```

```

        border-radius: 15px; /* Rounded corners */
        box-shadow: 0 4px 8px rgba(0, 0, 0, 0.3); /* Drop shadow */
        padding: 20px;
        max-width: 600px;
        text-align: center;
        position: relative;
    }

    /* Quote icon in the top-left corner */
    .poem-container::before {
        content: '"';
        font-size: 80px;
        color: #80cbc4; /* Light teal */
        position: absolute;
        top: -20px;
        left: 10px;
        font-family: serif;
    }

    /* Heading Styles */
    .poem-heading {
        background-color: #006064; /* Dark teal */
        color: white;
        padding: 10px;
        border-radius: 10px 10px 0 0; /* Rounded only at the top */
        margin: -20px -20px 10px -20px;
        text-align: center;
        font-size: 1.5em;
    }

    /* Poem Text Styles */
    .poem-text {
        font-style: italic;
        background-color: #e0f2f1; /* Light teal background */
        padding: 15px;
        border-radius: 10px;
    }

    /* Book Citation Styles */
    .citation {
        margin-top: 15px;
        font-size: 0.9em;
        color: #555;
    }
}
</style>
</head>
<body>
    <div class="poem-container">
        <div class="poem-heading">What Women Want?</div>
        <div class="poem-text">
            Isolation and leisure's grace,<br>
            Absence of warmth can shadow her face.<br>
            True fidelity, born of respect and insight,<br>
            Grows from understanding, not external plight.
        </div>
        <div class="citation">150 - Book Title - Five Mechanisms @
Amazon.</div>
    </div>
</body>

```

```
</html>
```

Explanation of the Code:

```
<style>
    /* General Page
    Background with Gradient
    */
    body {
        margin: 0;
        padding: 0;
        background:
        linear-gradient(to bottom
        right, #e0f7fa, #80deea);
        font-family:
        Arial, sans-serif;
        display: flex;
        justify-
        content: center;
        align-items:
        center;
        height: 100vh;
    }
```

<style> - beginning of CSS

Also note it has given comments

`/* General Page Background with Gradient */` is a comment.

`/* comment */`

Or

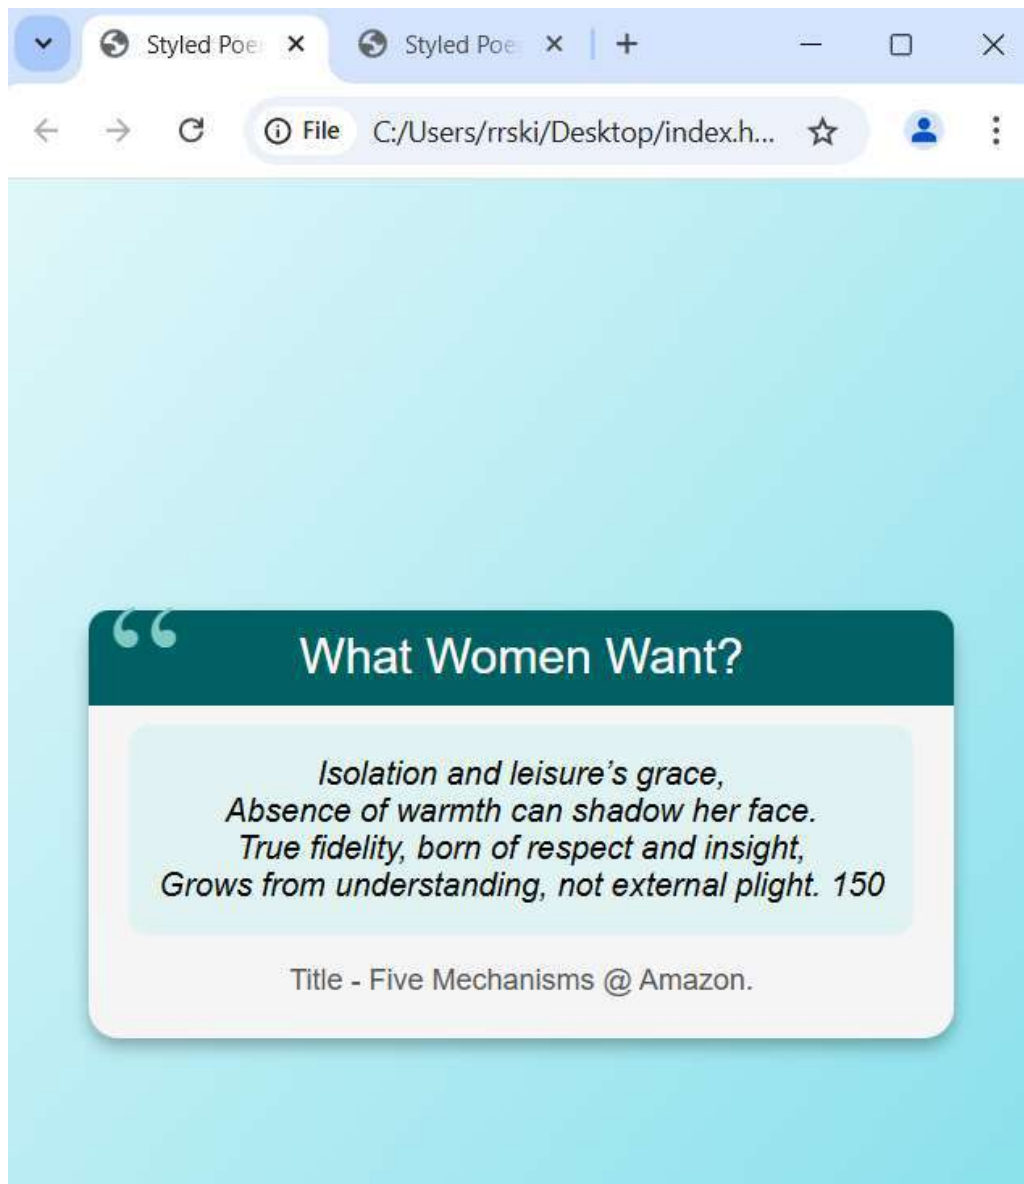

`// comment`

The `margin: 0` sets the margin of the `<body>` element to zero. Setting the margin to zero ensures the content starts flush against the edges of the screen. Similarly, the `padding: 0` removes any internal space (padding) within the body element. By default, the padding is often zero, but explicitly setting it ensures consistency across browsers. The `background: linear-gradient(to bottom right, #e0f7fa, #80deea)` creates a smooth gradient background for the body. The gradient starts with the color `#e0f7fa` (a very light teal) and transitions to `#80deea` (a slightly darker teal). The gradient direction is set to "bottom right," meaning the transition of colors flows diagonally from the top-left corner to the bottom-right corner. The `font-family: Arial, sans-serif` sets the text font for the body. If Arial is unavailable, the browser will fall back to a generic sans-serif font, ensuring a clean and modern look for the text.

The `display: flex` turns the body into a flex container. Flexbox is a layout system that makes it easier to align and distribute elements. Combined with `justify-content: center` and `align-items: center`, the content inside the body is centered both horizontally and vertically.

Lastly, `height: 100vh` sets the height of the body to 100% of the viewport height (vh stands for "viewport height"). This ensures the body occupies the full height of the screen, allowing the background gradient and flex alignment to work seamlessly.

A lot is happening in this CSS styling code, and the final result is as follows.

Gradually, you can master CSS with the help of ChatGPT. Learners can also ask ChatGPT for code explanations to enhance their understanding.

Explore CSS styling carefully to gain a better grasp of its concepts. To improve further, read more about CSS styling and practice with additional exercises using ChatGPT. Always use a single HTML file, as it makes it easier to drag and drop into ChatGPT for quick assistance.
